

Challenge

Combine all the newly learned concepts to work on a sample project.

- Create tab view that can be switched by user
- Create user page to insert user name and mark
- User list where all the users are listed (user list as another tab view)

Task 1 - Complete the activity exactly as per requirement

Task 2 - Complete the styling as well

Task 3 - Add one more column passed which will show "Yes" or "No" on each row based on mark. If the mark is greater than 20 then "Yes" or else "No".

Task 4 - Get users place also in add user form, and display that also in the table

Note : There will be No support provided by the trainers for the tasks
